Section 3: Comparison table

Criteria	LLM #1 (Gemini)	LLM #2 (ChatGPT)
Structure	The resume is highly structured with multiple sections such as Professional Summary, categorized Skills, Projects & Experience, Achievements, and Character References. It is well-organized but slightly more complex.	The resume follows a simple and straightforward structure with sections like Objective, Education, Skills, Projects & Experience, and Achievements. It is easy to follow but less detailed.
Content Completeness	Provides very detailed content by expanding on skills and experiences. It adds explanations and organizes skills into categories, making the resume more informative.	Includes all required details from the prompt but does not expand much. The content is complete but more basic and less descriptive.
Formatting and Style	Uses a more polished and professional format with clear section dividers and categorized bullet points. Visually more appealing and organized.	Uses a clean but simple format. Bullet points are straightforward with minimal styling, making it less visually detailed.
Professional Tone	Uses a strong formal tone with advanced wording and professional language, making it suitable for competitive job applications.	Uses a professional but more direct and simple tone. It is easier to read but less formal compared to Gemini.

Clarity and Conciseness	Clear but slightly longer due to added details and explanations. May appear slightly wordy.	Very clear and concise. Information is direct and easy to understand, making it more readable.
Creativity / Enhancement	Shows high creativity by improving wording, adding a professional summary, and reorganizing information into better categories. Enhances the original input significantly.	Shows minimal creativity. Mostly restructures the given input without adding much improvement or enhancement.
Overall Quality	Produces a high-quality, detailed, and professional resume that stands out and is suitable for competitive applications.	Produces a good and clean resume but simpler and less competitive compared to Gemini's output.

Section 4: Reflection

After comparing the two LLM outputs, I think Gemini performed better overall because its resume looks more professional and more detailed. It added a professional summary and also improved the way my skills and experiences were written. Compared to ChatGPT, Gemini made the resume look more complete and organized.

One of the main differences I noticed is in the structure and formatting. Gemini divided the skills into categories and used more formal wording, while ChatGPT kept everything simple and direct. ChatGPT's output is easier to read, but it is also more basic and not as strong in presentation. Gemini also added extra details even if they were not directly written in the prompt.

In my final resume, I combined the best parts of both outputs. I used the clearer and shorter points from ChatGPT but followed the structure and style of Gemini. I also made small improvements in wording and organization to make it more professional but still easy to read. from this activity, I learned that prompting is very important because the way you write your prompt affects the output of the LLM. I also learned that different LLMs can give different results even if the prompt is the same, so comparing them helps in creating a better final output.

PROFESSIONAL SUMMARY

A dedicated and highly resourceful Bachelor of Science in Business Management student at **Ateneo de Davao University**. I possess a diverse skill set ranging from digital content creation and technical troubleshooting to operational logistics. I am recognized for a solution-oriented mindset and the ability to bridge the gap between administrative tasks and technical demands. Committed to professional growth, I aim to leverage my bilingual fluency and analytical capabilities to contribute effectively to a dynamic team environment.

EDUCATION

Ateneo de Davao University | *Davao City*

Bachelor of Science in Business Management | 2024 – Present

- Currently developing a foundational understanding of organizational leadership, strategic planning, and operational efficiency within a premier academic institution.

Senior High School | San Pedro College Basic Education

Academic Track – Graduated With Honors

- Demonstrated consistent academic excellence and a strong commitment to multidisciplinary learning.

CORE COMPETENCIES

Digital & Technical Proficiency

- Productivity Suites: Advanced navigation of Google Workspace (Docs, Sheets, Slides) for professional documentation and data organization.
- Creative Design: Proficient in Canva and various multimedia editing tools to produce high-impact posters, presentations, and video content.
- Technical Foundations: Familiarity with basic programming logic and technical applications to streamline digital workflows.

Technical & Mechanical Aptitude

- Hardware Maintenance: Skilled in basic computer troubleshooting and the diagnosis of common software/hardware inconsistencies.

- General Repairs: Practical experience in performing minor mechanical and electrical repairs, ensuring the longevity and functionality of equipment.
- Logistics: Safe and responsible driving skills with a focus on punctuality and navigational efficiency.

Communication & Language

- Multilingual Fluency: Native or professional proficiency in Filipino, Cebuano, and Bisaya, enabling seamless communication across diverse local demographics.
- Interpersonal Skills: Ability to translate complex technical issues into understandable terms for non-technical stakeholders.

PROJECTS & KEY CONTRIBUTIONS

Technical Maintenance & Problem Solving

- Proactively identified and resolved mechanical and electrical issues in various settings, reducing downtime and ensuring the safety of operational tools.
- Applied a systematic approach to computer troubleshooting, successfully restoring system functionality for personal and academic projects.

Visual Communication & Media Design

- Conceptualized and executed visual assets, including promotional posters and instructional videos, ensuring all outputs met high standards of clarity and aesthetic appeal.
- Utilized digital editing tools to enhance presentation materials, effectively communicating complex ideas through visual storytelling.

Resource Management & Initiative

- Demonstrated a high degree of resourcefulness by independently researching and applying technical solutions to modern challenges, minimizing the need for external assistance.

ACHIEVEMENTS

- With Honors (Senior High School): Recognized for maintaining high academic standards and demonstrating leadership potential during secondary education.
- Technical Adaptability: Successfully self-taught basic programming and repair skills, showcasing a commitment to continuous self-improvement.
